Objectives and Investment Policy

- The Fund seeks to maximize the return on your investment through a combination of capital growth and income on the Fund’s assets over the long term commensurate with a defensive level of risk.
- The Fund will seek to achieve its investment objective by investing at least 80% of its assets in other funds, including exchange traded funds (ETFs), to gain exposure to fixed income (FI) securities (e.g. bonds) globally. The Fund may invest up to 20% of its assets in other funds, including ETFs, which seek to diversify their exposure across a variety of asset classes, including equity securities (e.g. shares), FI, money market instruments (e.g. debt instruments with short-term maturities), deposits, cash, and financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets).
- Generally, the Fund will seek to be positioned such that the Fund’s risk as measured by annualised volatility over a rolling 5 year period falls within the range of 2%-5%, however, the Fund’s risk profile may fall outside the stated range from time to time. Volatility is the measure of fluctuations of the returns of a given investment. Generally, the higher the volatility, the riskier the investment.
- For the purpose of managing currency exposure, the Investment Manager may use investment techniques (which may include the use of FDIs) to protect the value of the Fund, in whole or part, from changes in currency exchange rates against the base currency of the Fund. FDIs are investments the prices of which are based on one or more underlying assets.
- The investment manager has discretion to select the Fund’s investments.
- Recommendation: This Fund may not be appropriate for short-term investment.
- Your units will be accumulating (i.e. dividend income will be included in their value).
- Your units will be denominated in Euro, the Fund’s base currency.
- You can buy and sell your units daily. The minimum initial investment for this unit class is €5,000.

Risk and Reward Profile

Typically lower rewards  3  4  5  6  7  Typically higher rewards

- The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean risk free.
- The Fund is rated three due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund’s investments or expose the Fund to losses.

- Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- Particular risks not adequately captured by the risk indicator include:
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

The ongoing charges figure shown here is an estimate of the annualised charges. An estimate is being used because the Fund (or unit class) was newly launched or it has been launched within the reported period. The Fund’s annual report for each financial year will include detail on the exact charges made.

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.
